

The Daily News.

NEWPORT,
BY CRANSTON & NORMAN,
127 THAMES STREET.

THURSDAY MORNING AUG. 18, 1851.

We propose to comment upon the present condition and future prospect of Society in Newport during the fashionable visiting season.

Having been an attentive observer of society here during the last ten years, and closely watched all its different phases during that period, we have naturally been led to think much upon the subject, and although we may not have come to any very satisfactory conclusion, either to our own mind, or the minds of our readers,—still, our reflections may cause others to think upon the subject, and some beneficial result may ensue.

It is now some twenty-five or thirty years since Newport was first resorted to as a watering-place. At that time but few families, comparatively speaking, visited here, and those were mostly from the South, and chiefly from South Carolina. As a general thing, these persons came to enjoy a quiet summer, and to be invigorated by the cool breeze of our climate; in short, to pass the summer in a rational manner, without ostentation of any kind. This continued for some time; there were no large hotels here, and the expence of living, then, was comparatively light. For some years the only hotel of any note, on the hill, were the Bellevue House, first kept by Mr. Windsor, and subsequently, for many years, by Mr. Potter,—and also the hotel in Touro street, known as Whistfield's. There were also several private boarding houses in the vicinity. Some of the visitors also boarded at private houses in the more central parts of the town. In the course of time Newport became more noted as a watering-place, and the number of visitors began gradually to increase; accordingly enlarged accommodations were required, in the same proportion. Public attention was not turned seriously to the subject, however, nor was capital largely invested in this business, until after 1840. During that and the two subsequent seasons, the increase of visitors, not only from the South, but from various parts of the country, had been so great, it was found that the accommodations which then existed were entirely inadequate to meet the demand. An unsuccessful effort was made to build the Ocean House; in the summer of 1843 it was renewed, and the hotel was built the following winter, and opened in the summer of '44; during that winter it was enlarged, and on the 3d of the following August, when the house was full of guests, it was destroyed by fire.—Among the arrivals at the Ocean House we notice Madame Buschelle, the distinguished vocalist, and sister of W. V. Wallace, the eminent composer.

We also notice, at the same house, Mr. Marcoleta, the Nicaraugan Minister to this country.

Young has just received a lot of fresh and delicious Pine Apples; there is no fruit more healthy at this season of the year.

We notice the arrival of the Hon. Isaac Toucey, of Hartford, formerly Attorney General of the United States.

There will be a Hop at the Bellevue House, tomorrow, Friday, evening.

We take the following extract from a letter from the Ocean House, published in the Boston Transcript of Tuesday:—

I see that your neighbor of the Bee contained in a recent letter from Newport, a highly imaginative sketch of a little mystification which occurred, a day or two ago, in regard to a serenade given here to some very handsome and attractive women. I believe it is still doubtful who is most mystified—the author of that letter or the lady over whose pretended mistake he seems to enjoy a forced joke. At all events he admits that the lady, to whom he alludes, is the particular object of marked attention from three (perhaps more) different gentlemen. Of course the lady can make but one selection, and the idea naturally suggests itself that the authorship of the letter in the Bee may be traced to the author of the rejected addresses.

It will be seen by an advertisement in another column, that Prof. Taverner, of Trinity College, will favor the citizens and visitors of Newport, with his inimitable Readings with Dramatic Illustrations from Shakespeare, this evening at Ocean Hall.

Prof. Taverner has a fine rich toned voice, and so thoroughly enters into the spirit of his subject, as to keep intensely with him the sympathies of his audience. A friend remarked to us that no orator ever stirred his blood so vigorously as Prof. Taverner. (He is a genuine artist and a man of true genius. We do not hesitate to commend him as the very first in his profession who has visited this town for several years past.

HEALTH OF ST. LOUIS.—The city register of St. Louis reports 135 deaths during the week ending August 4, of which 53 were of children under five years old. The cholera deaths were 14. This report shows a much improved state of the public health. During the week ending the 14th of July, the deaths were 220, of which 74 were by cholera. Since then the disease has been on the decline.

in a transition state now, we think; and if the taste of the people is turned toward rational and sensible amusements in which the mind, instead of the mere senses, is called in requisition, the society at Newport during the fashionable season will be truly delightful. It is not for us to suggest how this manifestation of a higher intellectual taste shall be exhibited. We will make this remark, however; there are some very accomplished amateur singers, among the ladies at the Ocean House,—let them give the visitors the benefit of their talent and study, in the Saloon, occasionally, in the evening. Then again, we learn, although we have not had the pleasure of hearing her, that there is quite an accomplished amateur Shakespearian reader; let her also benefit the visitors with her Recitations, in a social way, in the Saloon. Many other ladies might be suggested, if the determination generally existed to raise the standard of amusements here during the summer.

We throw out these suggestions, with the hope that they will be improved upon, and that they may at least be the means, indirectly, of accomplishing a desirable result, and one which certainly must be in the highest degree gratifying to all persons of correct taste and intellectual refinement.

All the citizens of this vicinity, and many who have visited here from abroad, during the last two or three years, are fully aware of the nature of our sentiments as regards constant and promiscuous Dancing, and particularly the Waltz and Polka. Our opinion, in this respect, is entirely unchanged; we have no objections to Dancing, as an amusement, when it is conducted with reason and decency, which is not always the case. But we should like to see other and more sensible amusements indulged in; such as would exercise and improve the head and the heart, as well as the feet and the passions.

The Hop at the Ocean House, Tuesday evening, passed off in very pleasant style, it was numerously attended, and among those present were many of the prominent ladies of the House. Excellent Refreshments were served under the charge of McBride, the head-waiter, who always does everything just right,—assisted by his first Lieutenant, James Delap, one of the most prompt, polite and efficient men who was ever connected with any hotel.

Among the arrivals at the Ocean House we notice Madame Buschelle, the distinguished vocalist, and sister of W. V. Wallace, the eminent composer.

We also notice, at the same house, Mr. Marcoleta, the Nicaraugan Minister to this country.

Young has just received a lot of fresh and delicious Pine Apples; there is no fruit more healthy at this season of the year.

TWO WEEKS LATER FROM CALIFORNIA.

NEW YORK, Aug. 13.
The Steamer Prometheus, Churchill, arrived this A. M., from San Juan, Nicaragua, with 360 passengers and \$578, 579 in gold dust.

The Prometheus does not bring the mail.

She brings passengers from the steamer Pacific, which left San Francisco the 15th of July, and arrived at San Juan Del Sur on the 29th ult., bringing 425 passengers, and \$500,000 in gold dust.

Rice & Fell will serve up Green Tomato Soup, tomorrow morning, at 11 o'clock, at the Alhambra.

HUNGARIAN REVERSES.—The Packet ship Devonshire, Capt. Hovey, which arrived at New York Saturday morning, brought as passengers forty-seven Hungarians from Turkey, among whom are several military and civil officers of rank under the late provisional Government of Hungary.

CHRISTIAN STATESMAN.—Messrs. Gurney & Godloe have commenced the publication, in Washington, D. C., of a new Colonization paper, called the Christian Statesman. It is recommended by the executive committee of the Colonization Society, and, judging from the first number, bids fair to be a useful means of disseminating information connected with the Colonization movement.

CHARLES DICKENS is to commence a new serial novel, early in the autumn. The title and subject or not yet announced.

EXILE SWEETENED.—At Harper's Ferry, on Saturday last, Major Tochman led to the hymeneal altar the famous Hungarian heroine, Apollonia Jagello; both were residents of Washington City.

THE CUBA HUNT.—The New York Express has information, that it is now pretty accurately ascertained that Lopez has a force not less than 1200 strong. The New Orleans papers of the 3d maintain a mysterious silence in regard to the Pampere, which, it is well known, sailed from that port on the evening of that day.

PERIODICAL TOILET REQUISITES.

A most elegant and necessary appendage to the toilet of every lady and gentleman, forming a useful and beautiful present. They consist of the Amber Gum Wash, the "Portmanteau" Paste, the "Saponite" tooth Soap, Crow Quill Tooth Picks, a Tooth brush, &c., contained in a very elegant Receipt Case. It is pronounced by all, the most complete Dental Case ever offered to the Public and each and every article are warranted to be of the very finest quality. The Portmanteau has been in popular use for a year, during which time we have received the most unqualified testimonials from our most intelligent citizens and visitors, as well as from many eminent Physicians, of its superiority, over any thing in use, not excepting the expensive imported preparations, and we challenge a comparison of it entirely with any other Pastes or Powders whatsoever. It differs from all in one essential, cleaning the teeth, hardening the Gums and Purifying the Breath, and yet containing no Acid, or insoluble grit. The last test of real merit is its popularity after long continued use. We confidently assert that its sales during the past year have been greater than of all other Tooth Preparations for the past five years, in Newport. Price of the Case, Complete, \$1.50. The Portmanteau, separately, 25cts., the Amber Wash for 37 1/2cts. Manufactured and sold by

July 26.

A. CARD.
DOUT. P. GOURLARD,
Medical Doctor, a graduate of the Academy of
Medicine and Surgery of Paris, France,
SURGEON OCULIST,
DENTIST,

AND PROFESSOR OF CHEMISTRY: has the honor to apprise the Ladies and Gentlemen of Newport and vicinity; and, in general, his old acquaintances and former patients, for this sixteen years past; that he has begun now his former practice of Medicine and Surgery, at his Dwelling, No. 19 Bridge Street; where he offers his professional services to them, as a Surgeon and Oculist; his long experience and remarkable narratives, given to them, who placed confidence in his skill, dexterity and performances in giving general extraction, will have the merit to assure an enlightened public that their patronage will not be met with, under regard to their trust, either for themselves or their children, in regulating the defects of their teeth in the different operations performed in the art of Dentistry upon them.

As a Surgeon Oculist, in the varieties of diseases other than chronic, inflammatory or arachnoid, which afflict the Eyes and the Sight, either in young subjects or older ones; the Doctor during his sojourn in the city of Paris, has, by deep scientific and laborious studies, rendered himself amply acquainted with them, principally with those concerning the operations performed on STRABIC'S SICKLETS, or Squint Eyes.

This delicate operation which gives immediate relief to an awkward and disagreeable deformity of nature, performed by a skilful operator, is reduced to about 30 seconds, or, to the fastest, to one minute's stroke; and, no other hurt or sensation than the feeling of a note of sand, entering under the Eyeball, or the prick of a fine-candie needle, introduced in the flesh; as an evidence, the only sight or inspection of the instruments used in performing the operation, will be all sufficient to induce a Strabist, without any hesitation to desire the immediate performance of the operation.

It is necessary here to state, that in 1841, the Doctor was the first practitioner who introduced and performed the operation of strabismus, in the city of New York, upon 24 Subjects, with an unerring success, after having operated upon upwards of 800 in Europe, June 23.

P. GOURLARD,

Professor Alexander C. Barry's

Tricopherous, or Medicated Compound, for

restoring, preserving, and beautifying hair, tricopherous, and dandruff, and curing diseases of the skin, glands and muscles, etc., cuts, bruises, sprains, &c.—In order to convince the public of the efficacy of any curative preparation, in this thinking and reflective age, it is necessary to explain the philosophy of its operation. The process by which Professor Barry's Tricopherous produces such extraordinary results, cannot be understood, without a brief notice of the structure and uses of the delicate substances to which it is applied, and in the condition of which it accomplishes the most salutary changes. The connection between the hair and the skin is so close, that the one may almost be deemed a continuation of the other; and hence whatever generates, restores, and nourishes the hair, must, of necessity, have a healthful influence upon the sensitive membrane in which its roots are fixed. The skin, that wonderful envelope, in which the sense of touch resides, consists of three layers; the epidermis, or cuticle, a semi-transparent, or almost invisible film; the reticular membrane, which is a strong membrane, reticulated with nerves and blood vessels, and forms a sort of shield to the exquisitely sensitive true skin, and the true skin itself, which constitutes the third layer of the triple envelope. In this tough, flexible, and elastic investment, are located the nerves, blood-vessels, &c., which supply sustenance to the hair, and in the arrangement of which directs the skin originate. The vessels of the true skin supply the hair, containing the roots of the hair with the moisture which sustains the fibres, and the same causes which affect the health of the hair, also affect the health of the skin. It acts through the skin upon the hair, stimulating the most sensitive, opening the pores, imparting activity to the circulation, awakening from their lethargy all the vegetative functions which give life, vigor and beauty to the fibres, extracting every particle of scurf and dandruff, and soon clothing even the bald, or half-dressed head with a thick, glossy, silky, and elastic covering. But this is only one of the uses of Professor Barry's Tricopherous. The same properties which restore vital and vegetative power to the skin of the head, are equally beneficial in all cutaneous diseases and superficial injuries. Parents, nurses, ladies of insects, spinae, scorpion, blisters, pimples, scabs, ringworm, rashes, scrofula, prickly heat, chilblains, clapped hands, rheumatis, burns, scalds, blisters, rashes, redness of the skin, and in short, all the troublesome and painful external diseases and injuries which are so common in families, and which nothing but external remedies can remove, the Tricopherous will be found, safe, rapid and unfeeling cure. By virtue of its double claim as a restorer, and beautifier of nature's earliest ornament, and a potent and invaluable remedial agent, it is entitled to a place on every toilet and in every medicine chest. Sold in large bottles, price 25 cents, at the principal office, 137 Broadway, N. Y., and by the principal merchants and druggists throughout the United States and R. J. TAYLOR, Newport, and J. BALCH & SON Providence.
